

## **Bud Danenberger – presentation bullets**

My presentation entitled “North American Offshore Regulatory and Safety Issues” will briefly cover the following:

- Background information on N. American oil and gas operations
- Regulatory philosophy and what we view as the components to a comprehensive safety program
- Performance measurement tools
- North American issues/challenges:
  1. New technology
  2. Aging facilities
  3. Hurricanes/severe weather
  4. Vessel collisions with platforms
  5. Sustained casing pressure
  6. Crane and lifting incidents
  7. Helicopter incidents
  8. Management of contractors
