

Focus on Safety Management Systems

2008 - New Regulatory Framework for Offshore Safety

- **Performance-Based/Goal Setting Model**
- **Fewer prescriptive requirements**
- **Non-restrictive approach to technological innovations**

Minimum requirements for: *Mechanical Integrity, Risk Assessment, Contractors Selection, Internal Audits, Incident Investigations, Management of Change, Safe Working Practices, Simultaneous Operations etc.*

Operators - Develop custom-tailored safety management systems and demonstrate compliance with the ANP Technical Regulation requirements.

ANP - Installation Audits, Accident Investigation & Enforcement Actions
